MILHTIPS NOTES

OROZ and appurently not been acquesafel in its attempts to operate is the Busisk 2011 as on area. This agent is of the spinion shot JUD welders in the bey to OBOF sperations in land Salaburg. It is possible that he couble-errosed might. MS when he advised him to avoid contact with UEOF and then, apparently contacted them himself. Jib, as tred of the private oil dealers association, is in an exsellent position to defeat the purposes of the association by revealing the place to ORGE efficials and by misdirecting the extorte of the association of exitient income. Again, 1700 may be playing both eads against the middle in an offers to make quick and easy profits, or nie involvement with OHOP may to in the metuse of a reverse-twise boring from within operation. FWD's whempied trade of OROP-supplied No. 4/5/6 motor cil for "Velvoline" imported from Switzerland is electly an illegal operation. The only three legal ways tagen to this agent of importing or expecting polymerous to design ere through APP; through the large and livened companies such as Shell or Success; or through a peruly limited and local arrangement whereby potralous products may be analyzed from Vereriberg to Switcerland and vice veres, but only fur local esistanties and not for distribution to other purbs of Asstria. This Agest is every of the fact then GROP has tried to use the last-mentioned chancel in the past without specess. It is this agent's spinion that the NU-KLEM earlograble is probably the key to their treascetions in the WOODSTEE SAMES.
